What's New in Version 6:

- Displays preliminary judgment for any stock using a "First Impression" screen, helping you to instantly weed out unlikely candidates.
- Graph additional historical data points including dividends, net income, and book value.
- Graph analyst estimates to aid future projections.
- Display and print revenue-based EPS estimates on history graph.
- Choose to use average P/E Ratios from the last 5 or 10 years by default when estimating future prices.
- Share stock studies and discuss conclusions with investors in the StockCentral community, right within Toolkit 6. (Subscription required.)
- Identify potential stocks to study using the regularly-updated Roster of Quality Companies listing, downloaded automatically directly into the program. (StockCentral subscription required.)
- And much more!
